Part 1 – Gearing Up to Meet the Mission: milCloud® 2.0 Virtual Bootcamp Event

The milCloud® 2.0 mission doesn't stop amid a pandemic, and our Bootcamp events are no exception. On September 10, we're hosting the first-ever milCloud® 2.0 Virtual Bootcamp Event to ensure that Department of Defense mission partners have the latest knowledge to support the warfighter and ease the transition to the cloud.

The complimentary milCloud® 2.0 Virtual Bootcamp Event kicks off at **8 a.m.** with networking and a DISA Keynote, followed by technology panels showcasing the latest tech in the milCloud® 2.0 environment and a mission success spotlight covering real-world migration stories. The event will conclude at **1:45 p.m. EDT**.

Read on to learn more about what you can expect from the event.

So, how is this different than previous in-person Bootcamps?

If you've joined us for a previous Bootcamp event, welcome back! We're excited to see you virtually.

Since most of us are working remotely, we want to ensure you're still getting the content and information you need. As such, we're going virtual to put a fresh spin on the in-person Bootcamp events to provide more engaging content, use cases, and partner discussions.

During the event, you'll be able to:

➢ Hear from DISA in a keynote address on the progress of the milCloud® 2.0 program
➢ Hear case studies on successful mission partner migrations to milCloud® 2.0
➢ Attend panel sessions with key technology partners to learn more about the latest tech and capabilities available on milCloud® 2.0, as well as specific use cases
➢ Engage with milCloud® 2.0 program managers, fellow attendees, and the program speakers
➢ Visit partner booths and access exclusive resources
➢ Ask questions related to the technology, your mission, and more

What will the sessions cover?

Throughout the day, we'll dive into the newest technologies on-boarded onto milCloud® 2.0 in 2020. We'll cover a variety of topics, including:

• DISA's perspective on the latest milCloud® 2.0 developments and roadmap
• milCloud® 2.0's cloud services portfolio and its unique acquisition, pricing, and delivery model
• Typical application and data migration use cases with lessons learned
• Three mission partners' journeys to milCloud® 2.0 – the challenges, the solutions, and the step-by-step guide to meeting mission objectives

Check out the full agenda to learn more about what's on the schedule for Sept. 10. If you're unable to attend a session, we've got you covered – the sessions will be made available on-demand after the event concludes.

Throughout the day, you'll also be able to hear tech partners, program managers, and subject matter experts including:
